## Customer Reviews

This review is for the Weight Watchers cookbooks What to Cook Now, One Pot, and 50th Anniversary. I have the same comments and criticisms for all of them. The recipes are very nice, made of ingredients that are pretty much staples in our house. The prep is easy, no exotic equipment required. A variety of cooking methods are used, and many different ethnic styles are represented. We live in a small town in South Dakota, so if we can get the ingredients, most people should be able to, as well. We eat every dinner out of one of these books, and so far have only found 1 recipe that we didn't like. The pictures are nice as well. As far as this goes, I would have given the cookbooks a 5-star rating. However, the Index is terrible. I can't believe they have done the same lousy job in all three cookbooks. I use the index a lot when I'm meal-planning, and I know a lot of cooks do the same. Unfortunately, they evidently never bothered to have anyone who actually uses a cookbook on a regular basis test these out. Here are two examples of how the index is a failure: Let's say fresh salmon is on sale, and you buy some and want to find a recipe for it. You look in the index under "Salmon," and are stunned to find no recipes listed. So you have to either go through the whole book looking for salmon recipes, or go through the index line by line. OR, Let's say you want to find a specific recipe, like Chicken Lettuce Wraps, for instance. You look in the index under "Lettuce," but it's not there. It's not under "wraps," or "chicken," or even "Chinese." If you go through every line of the index, you'll find the recipe you want under A, because they named the recipe "Asian Lettuce Wraps."
