Shady Retreats: 20 Plans For Colorful, Private Spaces In Your Backyard

Synopsis

Most flowers and vegetables love the sun, but the gardeners who tend them crave the shade. A comfortable hammock strung between two trees. A set of Adirondack chairs arranged for conversation beneath a vine-covered arbor. A stone bench tucked into a quiet nook. These out-of-the-way outdoor retreats provide busy gardeners with cool relief from the hot sun, as well as precious hours of quiet, privacy, and peace. In *SHADY RETREATS*, lifelong gardener Barbara W. Ellis provides detailed plans for 20 gardens with shade as the theme. Each design includes easy-to-read blueprints and a glorious oil painting of what the garden will look like. Ellis also provides specific plant lists; suggestions on how to bring color into the shade; and practical advice on how to use shrubs, trees, vines, and man-made structures to create attractive, inviting, shady sanctuaries in any garden or yard. The garden design concepts are easy for even novices to grasp, and experienced gardeners will appreciate the unique inspirations and down-to-earth advice on how to adapt the concept of the shady retreat to fit their own garden's configuration. Complete with suggestions on how to use gazebos, containers, fountains, and other garden ornaments, plus an encyclopedia of approximately 100 shade-loving plants, *Shady Retreats* is an easy-to-use handbook that helps even beginning gardeners make the move out of the house and into a cool, inviting outdoor sanctuary. Customer Reviews

Shady Retreats: 20 Plans for Colorful, Private Spaces in Your Backyard"Let me show you my

private get-away", said the prospective client when she answered the door. Then, she led me into her back yard, overgrown with wild vegetation, and pointed to a clearing in its center, where slabs of antiquated patio stones paved the ground in the middle of the wild garden. There, she had placed an equally old, glass-topped, black, wrought iron table, with matching chairs. "This is where I eat my breakfast in the morning and sip martinis with friends in the late afternoon", she explained. "I love the sound of the birds chirping and the rustling of the wild foliage when the wind blows". At very little cost, this homeowner created for herself a shady garden retreat, a secluded, private, destination. Whenever she visits that part of her property, she leaves behind her usual routine, enters a soothing oasis, and for the brief time that she spends there, readjusts the pace of her life. Here, she is at peace with herself, at one with nature, and ready to engage in any activity, relaxing or exciting, that brings her pleasure. A shady retreat is in the range of possibility for most homeowners. All that is required is a bit of imagination and the guidance that this versatile publication supplies. With the help of the book's author Barbara W. Ellis, the architectural plans of Julie Burns, and the exquisite painted garden illustrations of Gary Palmer, any part of one's exterior home, no matter how small or large, can be transformed to serve as a retreat. Even a small porch or deck, will do.
