Microsoft PowerPoint 2010 Introduction Quick Reference Guide (Cheat Sheet Of Instructions, Tips & Shortcuts - Laminated Card)

PowerPoint® 2010 Introduction

Creating a New Presentation
You are presented with a blank, new presentation when you start PowerPoint. If you want to start a new presentation, click the **File** tab, click **New**, and then click **Blank Presentation**.

1. Click **File**, **New**.
2. Click **Blank Presentation**.

Adding a New Slide
Click **Home**, then click **New Slide**.
To choose a different layout for the new slide, click **Layout**.

Changing a Slide's Layout
Click **Home**, then click **Layout**.

Changing the Slide Orientation
Click **Design**, then click **Orientation**.

1. Click **Design**, then click **Orientation**.

Changing the Slide Size
Click **Design**, then click **Slide Size**.

Entering Text into a "Click to add..." Bulleted List Placeholder
1. Click on the placeholder and type the text.
2. To add another item in a bulleted list, press **Enter**.
3. To stop the list, press **Enter** again.

Starting a New Line Without a Bullet
To start a new line of text without creating a new paragraph, press **Shift** + **Enter**.

Moving from Title to Body with the Keyboard
When typing the title, press **Alt** + **Enter**. This moves the text to the body placeholder.

Adding Other Text on the Slide
To add text to a placeholder, click the placeholder.

1. Click where the text is to be added.
2. Type the text.

Changing Level of Indentation
1. Click on the text to be indented.
2. Click **Home**, then click **Bulleted List**.

Using the Outline Tab
Use the Outline tab to see an overview of your presentation. To display the Outline tab, click **View**, then click **Outline**.

Rearranging Bullet Points or Paragraphs
To rearrange the order of the bullet points or paragraphs, click the **Outline** tab. To move a bullet point or paragraph, click the **Outline** tab, click the bullet point or paragraph, and then drag it to the new position.

Changing the Text Font
1. Select the text to change.
2. Click **Home**, then click **Font**.

Changing the Text Size
1. Select the text to change.
2. Click **Home**, then click **Font**.

Enhancing Text: Bold, Italic, etc.
1. Select the text.
2. Click **Home**, then click **Font**.

Turning Off/On Bullets
1. Select the paragraph to change.
2. Click **Home**, then click **Bulleted List**.

Formatting Text with the Mini Toolbar
Use the Mini toolbar for quick access to common formatting options.

Viewing Many Slides at Once
Click **View**, then click **Slide Sorter**.

Rearranging Slides
In Slide Sorter view, click the slide you want to move, and then drag it to the new position.

Applying a Design Theme
Click **Design**, then click **Themes**.

Changing the Background of a Slide
Click **Design**, then click **Background**.

Adding a Header or Footer
Click **Insert**, then click **Header & Footer**.

Creating Speaker Notes
Click **View**, then click **Notes**.

Best Selection Shortcuts
Click **Home**, then click **Font**.

Moving, Resizing Slides
Click **View**, then click **Slide Sorter**.

To select text...
Click **Home**, then click **Font**.

Shortcuts
Click **Home**, then click **Font**.

Customer Reviews

This item came in handy to have available on my desk for quick reference. I recently purchased a new computer and it contained Windows 7 and a lot of the routine processes were somewhat different. Even if you have basic knowledge of Microsoft Excel, this is a handy reference laminated sheet to have available.

The "ribbon" above the working window of 2010 Microsoft Office products can be quite confusing to us "oldsters" who started using them back when Windows 3.2 was the best thing going. This compact fact sheet is a BIG help!

I got this "cheat sheet" for the 2010 version of Microsoft's OneNote program for my wife as a quick reference. It does include a number of the most basic features of the program, but I was not impressed overall. Quite a few of the features are not included on the sheet, and so it does not do the job of providing a quick reference to all of the capabilities of OneNote. The sheet itself is of nice quality; firm plastic laminate and quite legible. The OneNote program is a great tool for organizing a variety of subjects and both my wife and I both really enjoyed using the 2007 version of MS OneNote. The 2010 version is a substantial upgrade in capability as well as some changes in format, so I was hoping that a good quick reference guide would help ease my wife into the new version. Alas, the Intro Quick Reference Guide being reviewed is just too basic to be of much value.

This sheet is what Onenote has in its opening notebook. If you want the information just start the program for the first time and there it is. Dont buy the sheet.

MS Excel reference guide. Cheat sheets are quite handy as long as problem/info needed is not complex. Just about worth price. Vendor performance excellent. Shipped in 1 day & arrived quickly even though USPS. GN

Again, this is much better than buying a \$60.00 book and only reading the first 2 chapters. I do a lot of PowerPoint presentations so am fairly proficient in it, but I just went to PP2010. The little card gives me the basics and I don't have to spend 30 minutes looking through a book for what I need. Takes up less space on my already overloaded book shelf too.

this is a great short cut after you have read the book you can't remember everything and this gives a quick reference so you don't have to look up everything up in the book. the guide has all the main commands and makes it easy to find when your in the middle of a project.

I have used Excel on my Windows PC for many years. Just recently bought a MacBook. The commands are quite similar, although they vary slightly and the Excel for the Mac does slightly different things. This sheet makes it easy to find a command quickly.
