Customer Reviews

I love cleaning. I clean everything in my house especially my room. It has also been my exercise because I do it daily in the morning. I never thought there are various natural ways to clean your house until I found this book. Chapter 1, The Benefits Of Being Eco-Friendly was very informative. It gave me a lot of knowledge about the environment that we have. I also consider this chapter my favorite in the book. The chapter where the author states the household ingredients you will need was amazing. It's so resourceful and at the same time, saves a lot of money. This book is really a must-have especially if you're looking for ways to do a natural cleaning in your house.

It's almost embarrassing to admit I didn't realize how easy it is to clean with natural ingredients I already have in the house. I used to wonder why my grandmother always had borax around, and now I know. If you want a simple and effective way to clean floors, walls, toilets, mirrors, clothes and just about anything else in an eco-friendly manner this is a great introduction to natural cleaning. I don't want to give away the authors tips but you most likely have most of what you'd need already. Make the switch and help save the planet.

Great tips and recipes for Eco-friendly cleaning for your home. And the best part is...the money you will save now that you don't have to buy a number of different commercial cleaners for different areas of your house.

Very good information! I can't believe I am rating this little ebook a 5 star, but it deserves one. There are a lot of valuable tips in this guide.

Good recipes to use all around the home! Loved learning and keeping the home crazy clean!
